The Tandem Between The Richest And The Poorest

NEW YORK, NY July 1 (PinoyGlobal) - When Igor Sikorsky, a Russian engineer, invented the helicopter he got the idea from nature. He observed a tree seed with wings dropped to the ground turning around like a helicopter. His first dilemma was when he created the first helicopter that had only one propeller. It went up and down but it had no direction. So he came up with the brilliant idea of putting a small propeller at the tail to control the direction of the bigger propeller. And that's how the helicopter was born.

This concept could be used in selecting our leaders. Manny Villar Jr. will be the big propeller and Sen. Trillanes will be the small propeller. Their tandem will hover over our country into the flight of Philippine progress. Villar, the richest senator has an asset of one billion dollars. And Sen. Trillanes – the poorest prospective candidate has an asset of fifty thousand dollars. They represent both ends of the spectrum. The success of the nation is based on gross national happiness. This can be achieved with sound economy, clean environment, healthy citizens and good governance and this are achievable if both gentlemen are elected together.

Villar is now the undisputed leading contender for the presidency of the country. His experience is broad having been elected congressman for three terms, senator for two terms and Speaker of the House and Senate President. This shows his competence, effectiveness and resilience as a leader and on top of that his skill as an economist can be seen from what he did with his life. With a five hundred dollars initial capital he was able to put up a billion dollar industry. He is the first Filipino to compete with the fabulous business tycoons - Henry Sy, Lucio Tan and Danding Cojuangco – all of who are of Chinese origin, but he stood tall with them.

He is a proof that ordinary Filipino who has a vision

Dr. Erie Agustin graduated in Medicine at the University of the East in 1980. From 1984-1988 he was a Rural Health Doctor in Pangasinan. He came to the US in 1988, and was an ER doctor at Wyckoff and Parkway Hospitals for many years. In 2003, he opened his own clinic which thrives until the present day.

and the will to work hard can achieve success just like any other successful entrepreneur in other parts of the world. If he can use his technique on improving his life on running the government then I believe we will be out of the humbling status as a third world country

Sen. Trillanes represents good governance. If Manny chooses him as his vice president then it proves that he is no nonsense president, that he does not condone corruption or Trillanes himself will oust him. This will give people a sense of confidence and trust in the government because then they will know there is a guardian angel watching the actions of our president.

Sen. Trillanes has proven himself that he is willing to die or be jailed for clean administration and this is what we need – a righteous government. We cannot afford to have a corrupt government because we are a poor country. We have been suffering too long from corrupt administrations, starting with the late Pres. Elpidio Quirino down to Pres. Gloria Macapagal-Arroyo. Therefore, the nation desperately needs a change, kind of an oasis that provides water to people thirsty for honest leaders.

I believe the tandem of Villar-Trillanes will be fit for the jigsaw puzzle of good government.

There are other presidential candidates like Sen. Chiz Escudero, Mar Roxas, Loren Legarda, Noli de Castro, Joseph Estrada and if you close your eyes and follow your heart you might have an idea who will be the best president to replace Madam Arroyo.

Let us therefore create our own helicopter of leaders by using Manny Villar and Tony Trillanes in able for our country to lifted from the ground of the ground of poverty and corruption into the air of honesty and progress.
