The Priceless Lesson A Movie Gives

NEW YORK, NY January 20 (PinoyGlobal) - Avatar is just a movie but watching it one gets lost between fantasy and reality. It is the number one movie in history that made \$1.5 billion in less than one month.

Movies are meant to entertain but some movies are meant to influence human values and Avatar is one that does. It is a story about nature and God, Love and War and people's struggle against aggressors.

The theme of the movie occurred from two thousand years from now and million of miles away in a planet called Pandora. Man's technology has advanced that they were able to explore other planets in the same way as the Spaniards explored other nations hundreds of years ago. Because of important and expensive minerals man tried to mine these minerals, however in the process destroyed the sacred place of the indigenous tribe that forced them to fight back.

Avatar means big. Everything is oversized. Trees are as tall as the former World Trade Center, people are twenty feet high, animals have the size of Dinosaurs. The gravity is less and this makes the tall blue people climb up trees and mountains without any difficulty. Although it is all animated it looks so real and this planet of PANDORA is a paradise in its balanced state which can exist forever like a perpetual machine. It is called homeostasis.

EY'WAH, whom they call their God communicated with the people and when somebody would try to destroy their earth she would get upset.

Dr. Erie Agustin graduated in Medicine at the University of the East in 1980. From 1984-1988 he was a Rural Health Doctor in Pangasinan. He came to the US in 1988, and was an ER doctor at Wyckoff and Parkway Hospitals for many years. In 2003, he opened his own clinic which thrives until the present day.

There is an energy that flows in to every living thing and flows continuously. The life we have is from borrowed energy and when we die this energy leaves our body.

The trees are connected to one another like synapses of the brain and so when they are destroyed the flow of energy is disturbed. However, this balance is disturbed by an evil called human greed. People from earth tried to destroy a sacred tree because of a very important mineral found beneath it. Man tried to destroy everything using sophisticated machines. Trees as high as World Trade Center were downed by bombs. Tribes were killed by machine from helicopters. They were crying not because they were dying but because man destroyed their sacred place. However, they fought back with the help of EY'WAH and drove the evil people away.

Pandora will not exist two thousand years from now or millions away from earth. It is happening in 2010, 10km offshore of albay Bicol. It is in an island called Rapu rapu.

Rapu rapu is an island the size of Disney land. It was formed during the ice age. Because of its isolation for a million of years it has evolved unique plants and animals found only on this island. Hundred if not thousands of flora and fauna were not yet identified. There were birds, lizards, flowers not found in other places of the Earth. The people who lived there were not blue twenty foot human beings instead they look exactly like us because they are Filipinos. About two thousand of them who live in this island were like living in a cruise ship because everything they needed was available in the island. They had fresh water from the mountain, rice from level land, shell food and crabs from the shore and of course fish from nearby coral reefs. They had everything and they were living peacefully. Rapu rapu is the name of the tree that lives only in that island.

Everything was fine until 2005, when Pres. Gloria Macapagal-Arroyo approved an open pit mine in the island and it changed everything. What was a product of a million years of evolution was destroyed in few years. Because of open pit mine, fresh water disappeared, sea shells and crabs were gone and fishes were dying from mine tailings. Now the people are fighting back just like the indigenous tribes of Avatar to save their sacred place and they need our help.

The whole country is like Pandora. Because of human greed, we have destroyed 90% of our forest. Our country used to be 60% forested, but now it is only 10%. Thanks to logging concessions given to people like Juan Ponce Enrile and Chinese businessmen now we have a barren mountain. That is why we have floods and drought instead of dry and rainy seasons.

EY'WAH is mad that is why we have floods. We have disturbed the flow of energy among the trees. The tree is our life. Its roots communicate with each other and that is how energy flows. Life is about energy and when we are born energy flows into us and when we die the energy leaves us.
